Why use interior protection?

Between a perfect repair, a fair price and a dirty interior, the only thing a customer remembers is the dirty interior. Happy customers come back and tell others - unhappy customers don't come back but they still tell others!

Why use Slip-N-Grip[®]?

Slip-N-Grip[®] seat covers have two distinct layers - the bottom layer grips the seat to stay in place and the top layer is smooth allowing easy entry and exit from the vehicle. We pioneered closed loop recycling processes that divert and recycle landfill-bound plastic waste for use in our products.

Where are Slip-N-Grip[®] products used?

New and Used Vehicle Dealerships, Tire Service Centers, Auto Service Centers, Collision Shops, and many other facilities use Slip-N-Grip[®] products to help satisfy customers and make their business successful.

Little things that make a BIG difference!
